

**DANPAL WELCOMES AWNING WAREHOUSE  
AS OUR OFFICIAL DISTRIBUTION PARTNER IN  
SOUTH AFRICA**

**01.08.21**

We would like to officially welcome Awning Warehouse as our new distribution partner in South Africa. DANPAL has a long history in South Africa, and during this time, our products have been used in a number of high-profile architectural projects. Some of these projects include the new Discovery headquarters in Sandton, the redevelopment of 155 West Street also in Sandton, Silverstar Casino, Kyalami Corner, and the official specification for all new Total service stations.

It is our commitment to grow our local capacity, by increasing the number of specialist installers added to our list of recommended partners that has led to securing our new distribution agreement, with Awning Warehouse. We believe that our two companies have a shared vision to grow our footprint across the country and to provide world-class technical and sales support.

DANPAL can now supply our full range of architectural translucent building envelope systems, via Awning Warehouse, to specialist installers who respond positively to our specifications on all new and existing projects in South Africa. This is an exciting opportunity for all specialist installers in our local market, who were previously unable to access our range of Danpalon based products.

We look forward to introducing South Africa to our concept of *Light Architecture* and to developing professional working relationships via our new distribution partner. For more information on what we can do for you, find us at [www.danpal.co.za](http://www.danpal.co.za) and follow us on social media [www.facebook.com/DanpalSouthAfrica](https://www.facebook.com/DanpalSouthAfrica) or <https://www.linkedin.com/company/danpal-south-africa>
